

1 Intravenous BETA-BLOCKER: Not applicable

2 Oral BETA-BLOCKER: 50 mg metoprolol

3 Sublingual Nitroglycerine: One spray

4 Regular medication: Not applicable

Technical Quality & technical issues: Good quality study

Calcium score (AGATSTON):0

Volume:0

CORONARY ARTERIES:

Dominance: Codominant.

The coronary arteries have a normal anatomical configuration with no features to suggest coronary artery disease

CARDIAC FINDINGS:

Cardiac Chambers: No abnormality detected..

Ejection Fraction: 68%..

Cardiac Valves: No abnormality detected..

Pericardium: No abnormality detected..

Aortic root: No abnormality detected..

Pulmonary Trunk: No abnormality detected.

Pulmonary arteries: No abnormality detected..

Left atrium: No abnormality detected..

LIMITED CHEST CT FINDINGS:

Lung parenchyma: The visualized lung fields are within normal limits.

Pleural spaces: Clear.

Chest wall: Within normal limits.

COMMENT & IMPRESSION:

The coronary artery CT scan is within normal limits with no features of coronary artery disease with normal anatomical configuration.

Thank you for referring this patient.
