

Chambers: The left ventricle, right ventricle, left atrium and right atrium appear normal in size and appearance.

Pericardium. There is a trivial amount of pericardial fluid, which is likely within normal limits.

Valves: The aortic and mitral valves appear normal.

Great vessels: The visualised aorta and pulmonary artery appear normal.

Extracardiac Findings:

Lung: The visualised lungs appear clear.

Upper abdomen: The visualised upper abdomen appears normal.

Osseous structures: The visualised lungs appear normal.

Impression:

No evidence of significant coronary arterial disease.

Coread by Dr Mickey Mouse and Dr Donald Duck.
