MRN:

Proc. ID: **4136932**

Exam Date: **31-MAY-2019**

CT Coronary Angiogram performed on 31-MAY-2019

Performing Radiographer:

Indication:

45F day 1 post laparotomy for endometriosis; developed anterolateral T wave inversion on ECG.

Technical parameters:

A CT Coronary Angiogram was performed using a 320 row detector cardiac CT scanner. The images have been evaluated on a 3D work station.

Heart rate: 65 bpm

Radiation dose (DLP): 59 mGycm

Intravenous Beta-blocker: No

Oral Beta-blocker: No

Sublingual GTN: Yes

Technical Quality & technical issues: Good

Coronary arteries:

Dominance: Right

LM:

The left main coronary artery arises from the left coronary sinus and divides into the left anterior descending and left circumflex coronary arteries. There is no haemodynamically significant stenosis.

LAD:

The left anterior descending coronary artery gives rise to a couple of tiny diagonal branches. There is no haemodynamically significant stenosis.
